

ABOUT HYTORC®

Leading Innovation in Torque and Tension Since 1968

The World's Most Trusted Industrial Torque and Tension Systems

HYTORC® Makes Industrial Bolting Safer and Simpler

With over 40 years of experience focused entirely on industrial torque and tension systems, HYTORC is the most trusted name in the industry. From steel mills and mining equipment to refineries, nuclear power plants, and wind turbines; we have developed solutions for nearly every bolting application imaginable.

WHY HYTORC?

TRAINING AND EDUCATIONAL PROGRAMS

HYTORC has worked together with OSHA and the ASME to create bolting courses and specifications that are designed to increase safety on bolting jobs. For the first time, OSHA certified bolting courses can be given at a customer's site to train anyone that will be using the equipment on safe handling and operation. This applies to bolting equipment made by other manufacturers as well. HYTORC takes job safety very seriously, and while developing safer products lessens the chance for incidents in the future, these courses are the best way to immediately increase safety and reduce the possibility of OSHA recordable incidents.

FREE SERVICES

- FREE User safety training upon receipt of merchandise

- FREE Lifetime safety/durability/function upgrades

WORLDWIDE CUSTOMER SERVICE

The goal of 100% customer satisfaction is deeply embedded in every aspect of the business. Every HYTORC customer is entitled to free 24/7 phone support as well as free safety training, product operation training, and many more unique benefits. Additionally, all HYTORC products are covered by a worldwide one-year no-questions-asked warranty, which includes free parts and labor - another first in the industry. With authorized repair facilities located all over the world, a one-day turn-around is usually available.

HYTORC also has a new mobile service division that is available in many areas to provide on-site calibration and repair. With this service, free tool inspections are available and reminders or follow-up visits can be easily planned for all future calibrations.

HYTORC has the most experienced job supervision teams in the industry
